

An **AUTOCROSS** is the ideal environment in which to learn or improve car control skills while at the same time having a lot of fun. It is an event that favours driver skill over outright horsepower, but at speeds higher than those experienced in motorkhanas. The Autocross course is usually laid out (using hay bales, drums or plastic cones) on a large grass or gravel area such as a farm paddock or a car park, although some clubs have purpose built Autocross circuits. Competitors compete in Autocross events individually against the clock with the winner being the person who completes the course in the shortest time. Because the event venue is usually a wide open space, the risk of vehicle damage is low. As for motorkhanas, it is a cheap event in which to participate and perfectly standard road cars can be very competitive.
